Egg Replacements in Baking

Eggs are an important staple of many baking recipes. They serve several crucial functions, such as binding, leavening, and providing moisture to the final product. However, some people are unable to consume eggs for a variety of reasons. If you are one of these people, baking can seem daunting. Fortunately, there are several substitutions that will allow you to continue enjoying your delicious treats without using eggs.

Two popular egg replacements are applesauce and banana. These things work well enough to provide moisture to your dessert, but they are suboptimal replacements overall, because providing moisture is only one function of the egg. When using applesauce or banana in place of eggs, you may find that your baked goods crumble or do not rise properly. Luckily, here are other

ways to achieve binding and leavening effects that are more similar to those of eggs.

Eggs help emulsify the disparate ingredients of your recipe into one homogenous batter or

dough. To achieve this, it is most effective to use something with protein or fat that will bind to the starch. One option is a quarter cup of plain yogurt, sour cream, or buttermilk for each egg—either dairy or non-dairy will work just fine. Another option is ground flax or chia seeds. For each egg, combine 1 tablespoon of ground seeds with 3 tablespoons of warm water and leave the mixture to rest at room temperature for about 10 minutes before using.

Either of these options will effectively bind your ingredients. However, if you are baking something that needs to rise, like a cake, you may want to give your dessert a little additional help. In this case, mix 1 teaspoon of baking soda with 1 tablespoon of a neutral-flavored vinegar, such as white or apple cider, and add this mixture alongside the other wet ingredients.

Stimulus: 1 of 5

Which of the following is a relevant idea needed for an objective summary of this text?

Emulsification is one of the most difficult cooking tasks for the home chef.

Egg substitutes should bind and leaven the recipe ingredients,

Nondairy items do not work well as egg substitutes.

The best recipe outcomes require the inclusion of eggs.

Stimulus: 2 of 5

Which of the following statements identifies the author's point of view in the passage?

Applesauce works better than most egg substitutes.

Egg substitutes are no replacement for the real thing

Chia seeds and bananas are the egg substitutes that yield the best results.

There are a number of egg substitutes for recipes.

Stimulus: 3 of 5

Which of the following textual evidence is used by the author to reinforce their claim that egg substitutions are plentiful?

Bananas or applesauce provide the moisture necessary for baked products.

Leavening is the amateur chef's biggest challenge.

There are both dairy and nondairy options for egg replacements.

Emulsification can lead to ruined recipes.

Stimulus: 4 of 5

Which of the following is a false or misleading statement based on the given textual evidence?

When using egg alternatives, the substitutes can be vegan or dairy-based.

When using egg alternatives, people with egg allergies can still enjoy their favorite recipes.

When using egg alternatives, you do not need to use fat to bind to the starch.

When using egg alternatives, a proper substitute needs the ability to emulsify.

Which of the following would be a relevant piece of data to support the claim that there are several substitutions for eggs in baking?

A table depicting the ratio of dry to moist ingredients in baking

A graph depicting the rise of egg allergies over time

An image depicting a microscopic view of yogurt culture

An infographic depicting the properties of the ingredients used in baking

Sales Associate Position

Salary: \$15 to \$18 per hour

Job Type: Full time or Part time

Shift and Schedule: Weekdays, Evenings, Weekends

About Us: Button Land is the number one destination for buttons. We are dedicated to providing any button our customers could need. In addition to utility buttons, we stock a variety of antique and vintage buttons. Our team is passionate about helping our customers find the perfect button.

SEE ADDITIONAL Files

2 Passages Added

Qualifications: Previous sales and customer service experience preferred but will consider candidates without this experience who have a passion for buttons. Candidates must have strong communication, time management, and social skills. All candidates must be willing to work weekends.

Stimulus: 1 of 2

Which of the following could a reader conclude is true based on the information in the passage?

An applicant will not be hired without previous experience in sales.

An applicant should have a passion for buttons and zippers.

The successful applicant would not be asked to work weekends.

The successful applicant should have open availability.

Stimulus :2 of 2

Which of the following conclusions does the information in the passage support?

This sales and customer service position is a management level job

This sales and customer service position is a job that requires a lot of driving.

This sales and customer service position is a temporary summer job.

This sales and customer service position is an entry level job.

BUTTERBEAN FOR MAYOR

Butterbean wants to be YOUR new mayor. Is there an election coming? No. Can dogs even be mayors? Unclear. But consider what Butterbean has to offer:

- FRIENDS WITH EVERYONE

Big dogs. Small dogs. In-between dogs. All the people. If you go for walks, you've met Butterbean and she loves you.

- JUST A REGULAR DOG

Butterbean is a regular dog for regular folks. She's not a fancy breed, just a dog. Sure, maybe she eats more socks than her vet recommends, but nobody's perfect.

- HATES RATS

You hate rats. Butterbean hates rats, too. She will not rest until they have all been chased from our streets. By her, personally.

Can Butterbean count on YOUR vote? Or at least a treat?

Stimulus: 1 of 2

Which of the following best describes the purpose of the passage?

To instruct the audience how to vote for Butterbean at the polls.

To argue that Butterbean can hold political office.

To entertain people with the idea that a dog could hold political office.

To inform the audience about the benefits of owning a rescue dog.

Stimulus 2 of 2

Which of the following ideas, if added to the text, would make the passage more persuasive?

The author proves that dogs can be mayors by citing examples where dogs were elected as mayor.

The author provides data on how many visits to the veterinarian for eating socks Butterbean has made.

The author proves that the city has a rat problem that people cannot solve.

The author provides a graph that shows the popularity of "regular" dogs vs. pedigreed dogs.

An Ode to Naps

The rain is tapping footsteps on the roof
It sounds a lovely dance inside my head
This peaceful aura only serves as proof
That I should dodge my work to lie in bed

The pillows pull me in with their behest
A trap that I do not want to escape
The blankets form a most enticing nest
They wrap me in a shroud that won't undrape

I'm tempted further by my furry friends
They've taken o'er the mattress in a pile
Oh, how I want to nestle in with them!
But first, I know that I must work awhile

I promise, bed, I will be back for you
I'll surely nap before the day is through

Stimulus 1 of 3

Which of the following pairs of words from the text is relevant information to pass onto an illustrator who is creating art related to the poem for publication?

Shroud, nest

Aura, roof

Footsteps, enticing

Dance, tempted

Stimulus 2 of 3

What of following explains the effect that word choice has on the meaning of the passage?

The author selects threatening words like "tempted" and "undrape" to inform on the dangers present.

The author selects rhyming words like "pile" and "awhile" to create a lyrical moment in an informative writing.

The author selects contrasting words like "peaceful" and "dodge" to compare two unlike activities.

The author selects negative words like "trap" and "escape" to demonstrate that sleeping is a challenge.

Stimulus: 3 of 3

Which of following pieces of data supports a conclusion that the reader can draw from the passage?

As self-reported in a research survey, people who lived in locations that received more than 60 inches in average precipitation indicated better levels of rest and lower levels of anxiety.

In a qualitative research study, respondents reported they felt more satisfied with their lives when they were able to sleep in conditions and for a duration that was self-selected.

Individuals who had multiple mammals as pets indicated they felt more satisfied when self-reporting on their happiness. Individuals who slept in the same room as their pets report even higher happiness levels.

Productivity fell among workers who got less than 5 hours of sleep; conversely, workers with more than 8 hours of sleep demonstrated almost double productivity than their sleep- deprived

peers.

Question 8

Manhattan seems to sprout shiny new skyscrapers as easily as a garden grows weeds, but despite the modern appearance of the concrete jungle at the heart of New York City, every engineer knows that before breaking ground, they need to step back in time, with the help of Viele's map. In 1865, Egbert Viele, a civil engineer and Civil War veteran who surveyed the land for Central Park and later served in Congress, published a map that is still crucial almost 160 years later. His map showed all the original marshes and waterways of Manhattan. Even today, engineers rely on his work to determine soil conditions and any underground water that still flows through a building site, potentially undermining foundations.

Stimulus 1 of 2

Which of the following pieces of evidence from the text supports the conclusion that Viele's work had an impact on the development of Manhattan island?

Residents of Manhattan Island find it easy to grow gardens due to the well-established water map.

Builders must analyze potential sites for stability, which affects the building type and zoning options.

Viele proposed that structures be made with locally made concrete mixed with water sources on the island.

Central Park continues to flood, which Viele set out to prevent with his map.

Stimulus 2 of 2

Which of the following additional resources would validate the information given in Viele's map?

A map of the wetlands on Manhattan Island used to observe migratory birds

A map of the New York City transit system

A map showing population density of New York City by borough in 1865 and 1965

A map of Civil War battle sites in and around Manhattan

Alice was not scared. Not at all. Maybe a little bit. But she was determined to confront the ghost in her house. Alice lived in a farmhouse built in 1921. All of the floors and doors were original; the doors even had skeleton key locks. But by far the most terrifying part of the house was the basement. She kept that door locked and ignored the thumps, crashes, and cries that came from below the house. What made Alice determined to confront the ghost today was the especially loud crashes the previous night. She'd gotten no sleep, convinced the ghost was going to break through the door and do something horrible. What, she wasn't sure, but the ghost would do something.

Alice hadn't seen the ghost, but what else could be making loud noises in an old house? The one time she had been down in the basement was after buying the house unseen. Once she saw the shelves with old glass jars, she was a little put off. But what made her keep the door shut and locked was the abrupt end of the concrete floor halfway across the room. Because nothing good ever happened in a basement with a dirt floor. Alice had seen enough horror movies to know that.

Alice stared at the basement door, trying to gather enough confidence to open it and march down the stairs like she owned the place. Because she did-or she would, once she finished paying her mortgage in 30 years. Alice took a deep breath and yanked the door open. She marched down the stairs, only to stop abruptly at the bottom. Because she was face to face with not a ghost at all. It was a calico cat, one who looked utterly unimpressed by her brave journey into the basement.

Stimulus 1 of 7

Which of the following words from the passage indicates time sequence or the order of events?

But

Maybe

Once

Because

Stimulus 2 of 7

Which of the following time frames is a gap in the sequence conveyed in the passage?

From the night when she heard the loudest noises and then couldn't sleep

From when she bought the house unseen until she saw the jars in the basement

From when she was looking at the basement door and then entering it

From when she opened the basement door until she saw the calico cat looking unimpressed

Stimulus 3 of 7

Which of the following phrases from the passage added humor to an otherwise fearful mood?

All of the floors and doors were original; the doors even had skeleton key locks.

But what made her keep the door shut and locked was the abrupt end of the concrete floor halfway across the room.

Because she did-or she would once she finished paying her mortgage in 30 years.

She'd gotten no sleep, convinced the ghost was going to break through the door and do something horrible.

Stimulus 4 of 7

Which of the following pieces of evidence from the text supports the prediction that Alice finally entered the basement because she was frustrated?

Because nothing good ever happened in a basement with a dirt floor.

She kept that door locked and ignored the thumps, crashes, and cries that came from below the

house.

The one time she had been down in the basement was after buying the house unseen.

She'd gotten no sleep, convinced the ghost was going to break through the door and do something horrible.

Stimulus 5 of 7

Which of the following is misleading information that Alice uses to support her argument that the house is "terrifying"?

The basement has a dirt floor.

The doors have skeleton key locks.

There are glass jars on the shelves in the basement.

The doors and floors are original to the home.

Stimulus 6 of 7

Which of the following would be relevant evidence to conclude the basement has a ghost?

There were cobwebs in the corner of stairs leading to the basement.

The previous owners said they had experienced supernatural events as well.

The county cemetery is a mile from Alice's house.

Alice's horoscope said that she would have an unexpected encounter.

Stimulus 7 of 7

Which of the following is evidence to support the interpretation that Alice thinks ghosts can be contained?

All of the floors and doors were original; the doors even had skeleton key locks.

She kept that door locked and ignored the thumps, crashes, and cries that came from below the house.

Once she saw the shelves with old glass jars, she was a little put off.

Alice had seen enough horror movies to know that.

Mourning geckos (*Lepidodactylus lugubris*) are truly a unique species. This gecko is small, as it only grows up to 10 cm or 4 inches. With a range of Hawaii, the South Pacific islands, and Central and South America these geckos have one of the largest ranges among reptiles.

What really sets this species apart is how they reproduce. Mourning geckos are all female and reproduce through parthenogenesis, where the mother essentially clones herself to create her offspring. However, their genes have the ability to recombine to allow genetic variation and mutation. Like many other geckos, mourning geckos lay two eggs at a time several times a year. The eggs incubate for 65 to 103 days.

Stimulus 1 of 3

According to the passage, which of the following definitions most closely defines the prefix "partheno-"?

Without females

Without fertilization

Without Incubation

Without shells

Stimulus 2 of 3

Which of the following is a conclusion the reader might draw from the information in the passage?

Their small size means mourning geckos are easy to keep as pets.

Because their offspring are clones, all mourning geckos are identical.

Mourning geckos are an endangered species.

Genetic variation and mutations may give mourning geckos a better chance for survival.

Stimulus 3 of 3

Which of the following credentials would increase the author's credibility?

The editor of a prominent American newspaper

The head librarian at a nationally renowned university

A wildlife photographer for a well-known nature periodical

A senior zoologist at a zoo in South America

Question 25

On February 2 of each year, the United States observes the unusual holiday of Groundhog Day, a day of hope that winter is over and spring is beginning. This tradition has been officially

observed in the U.S. since the 1800s, and is believed to have developed from European folk traditions in which a bear, fox, badger, or even hedgehog would serve as the symbolic meteorologist. Although other cultures and towns observe Groundhog Day (or something similar), the town of Punxsutawney, Pennsylvania takes special pride in being home to the one true forecasting groundhog, Punxsutawney Phil. At the turn of the twentieth century, townspeople formed the Punxsutawney Groundhog Club to perpetuate the joyful rituals and events surrounding Groundhog Day. Over the years, these events have come to include a scavenger hunt, a talent show, and a ball.

Legend has it that on Groundhog Day the official weather forecasting groundhog awakens from hibernation and comes out of his burrow to look for his shadow. If he sees his shadow, six more weeks of winter are to come, and Punxsutawney Phil goes back to bed. However, if he does not see his shadow, Punxsutawney Phil takes this as a sign that spring has arrived, and he remains above ground. Of course, common sense tells us that February 2 is too early for spring to begin, and that while animals may be attuned to various elements of nature from which humans might learn, they are unlikely to act on their instincts based on a schedule set by a Gregorian calendar. Nevertheless, a visit to Pennsylvania to see Punxsutawney Phil and all of the fun he inspires each year might just provide the touch of hope needed to reach the end of winter.

Stimulus 1 of 3

Which of the following pairs of search terms entered into a search engine with the phrase "Groundhog Day" is likely to produce information about the origin of Groundhog Day?

Holiday and festivities

Habitat and diet

Weather and farming

History and folklore

Stimulus 2 of 3

Which of the following evidence from the passage supports the inference that Groundhog Day is

an entertaining tradition?

This tradition has been officially observed in the U.S. since the 1800s and is believed to have developed from European folk traditions.

On February 2 of each year, the United States observes the unusual holiday of Groundhog Day, a day of hope that winter is over and spring is beginning.

Legend has it that on Groundhog Day, the official weather forecasting groundhog awakens from hibernation and comes out of his burrow to look for his shadow.

Over the years, these events have come to include a scavenger hunt, a talent show, and a ball.

Stimulus 3 of 3

What source would be most useful in determining the reliability of Punxsutawney Phil's predictions over a number of years?

A memoir from a member of The Groundhog Club

A record of weather patterns in the last decade

A historical survey of customs in Pennsylvania

An encyclopedia entry on mammals in the northeast U.S.

The jurors for the trial were randomly selected from a pool.

In which of the following sentences does the word "pool" have the same meaning as the sentence above?

They looked nervously at the pool of oil under the car.

The pool of available workers diminished during the summer.

The group planned to meet at nine o'clock at the pool hall.

The children had to pool their money to buy ice cream.

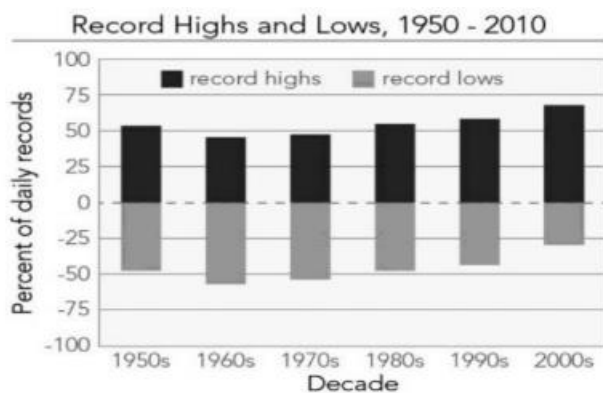

When evaluating an author's point of view, which of the following is important for the reader to consider?

The author's biographical information, such as date of birth

The author's success in achieving the purpose of their writing

The author's personal or business interest in the subject

The author's written use of jargon and informal language

According to the graph, which of the following statements is correct?

According to the graph, which of the following statements is correct?

According to the graph, which of the following statements is correct?

More decades reached greater than -50% of low daily temperature records than reached greater than 50% of daily high temperature records

More decades reached greater than 50% of daily high temperature records than reached greater than 50% of low temperature records

Only one decade reached less than -25% record low temperature records

USD/IPY -1.83%

This label appears on a bottle of over-the-counter cold medicine.

This medication should be used to treat mild respiratory infections. Do not take this product unless directed by a doctor if you have a long-term respiratory problem such as emphysema or chronic bronchitis.

Which of the following statements best summarizes the warning label?

Anyone taking this medication must have a doctor's recommendation,

Patients who have a mild respiratory infection should consult a doctor

if you have a respiratory problem, take this medication only if directed by a doctor.

This medication is intended to treat long-term respiratory illnesses

Tommy pulled off his boots, carefully using the brush he kept on the porch to clean the mud off of them. When he came inside, he followed his daily ritual of climbing the stairs to the laundry room and carefully removing his coveralls. As he did every day, he changed into the clean white T-shirt and lounge pants that he'd left sitting next to the washing machine.

Based on the passage, which of the following words describes Tommy?

Idle

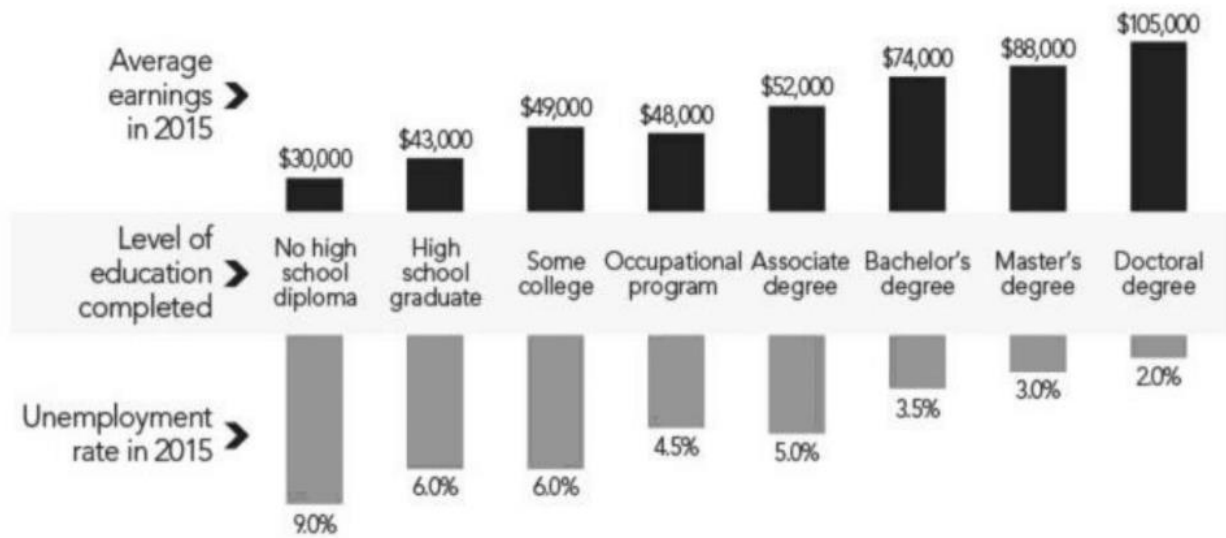

Meticulous

Considerate

Slow

According to the graph, which of the following statements is correct about employment in 2015?

According to the graph, which of the following statements is correct about employment in 2015?

If a person had a doctoral degree, she was never unemployed.

There was a greater chance of being unemployed with an associate degree than if a person had completed an occupational program

Having some college but no degree gave people a better chance to be employed than having a high school degree.

A high school graduate had a higher unemployment rate than a person who never graduated.

Copy the letter string above on a piece of paper. Cross out the first and last letters. Replace the letter B with the letter Q. Insert a U after each Q. Switch the first and last letters.

Which of the following letter sequences remains on the page?

QKGAQUCI

CKGAQUQU

HCKGAQUO

UKGAQUOC

In the middle of the finance meeting, he started talking about the company holiday party, which

was neither here nor there.

Which of the following is the meaning of the phrase "neither here nor there" in the sentence above?

Very close

Not relevant

A very serious matter

Not surprising

The clues in the sentence were so helpful, the reader was able to fathom the meaning of the word beyond a shadow of a doubt.

Which of the following is a synonym for "fathom" as used in the sentence above?

Consider

Ascertain

Sound

Pronounce

Peanut Butter Cookies

Grandma Harry 30 minutes Cookies/Desserts Makes | dozen

1 egg white

3/4 cup sugar

1 cup peanut butter

1 teaspoon vanilla

1/2 cup flour

Beat egg white until foamy. Stir in sugar, beat again until stiff peaks form. Gently fold in peanut

butter and vanilla. Add flour in small increments until dough forms. Chill dough for at least 2 hours. Roll into balls, roll in sugar, press down with a fork, and bake at 350 degrees F for 10 to 12 minutes. Let cool on cookie sheet. These are very fragile.

Stimulus: 1 of 2

Which of the following conclusions can be taken from the passage?

The cookies made with this recipe would be good to send to college students.

The cookies made with this recipe are especially good for midnight snacks.

The cookies made from this recipe would be good to serve at a large party.

The cookies made with this recipe may have been handed down in a family.

Stimulus: 2 of 2

Which of the following statements about the passage is true?

Beating egg whites means stirring them vigorously.

Folding in peanut butter must be done with an electric appliance

These cookies should be cooled on a baking rack.

These cookies can be cooked in a microwave oven.

Few things bring back childhood memories for me like baking Toll House chocolate chip cookies. This cookie recipe has humble beginnings. Ruth Wakefield of the Toll House restaurant in Whitman, Massachusetts, created it. The recipe appeared in a 1938 cookbook written by Wakefield called Tried and True. A year later, Wakefield sold the recipe and the use of the Toll House name to Nestlé for one dollar, and the rest is history.

Which of the following is the topic of this passage?

A history of the Nestlé company

How to make money as a baker

Childhood memories

Ruth Wakefield's cookie recipe

An athlete is ordering new running shoes online from a European shoe company. In U.S. sizes, she normally wears a size 8 or 8.5, depending on the brand of shoe. In order to make sure she orders the correct size from the European shoe company, she measures her foot, and finds that it is 24.5 centimeters long. Based on the size chart, which European shoe size will probably be the best fit for the athlete?

A consumer recently purchased a new car and paid \$48,000. This amount is \$2,000 less than twice what the consumer's friend paid for their car. Which of the following is the amount that the friend paid for their car?

\$25,000

\$46,000

\$23,000

\$50,000

If (D) is distance travelled and (R) is the rate of travel, which of the following represents the relationship between D and R for the equation $D = 2R$?

R is twice as much as D.

R is two more than D.

D is twice as much as R.

D is two more than R

Which of the following is 31% of 426?

425.69

132.06

0.07

13.7

The length of a rectangle is 3 units greater than its width. Which expression would correctly represent the perimeter of the rectangle?

$$2W + 2(W + 3)$$

$$W(W + 3)$$

$$wtwt3$$

$$2W + 2(3W)$$

Which of the following is the best description for the data set below?

1, 1, 2, 2, 2, 2, 3, 3, 7, 7, 8, 8, 8, 9, 9, 9

Uniform

Bimodal

Left-skewed

Right-skewed

A new physician saw 841 clients during the first year of practice and 1,072 clients during the second year of practice. Which of the follow represents the approximate percentage increase in client volume?

78%

27%

22%

127%

In a study of the average weight of babies at different time intervals after birth, the babies' measured weight is which of the following variables?

Independent

Constant

Contra

Dependent

Which of the following expressions represents the sum of three times a number and eight times a different number?

$$8x - 3y$$

$$3x - 8y$$

$$8x + 3x$$

$$3x + 8y$$

Elevation above sea level and temperature are negatively-correlated variables. Which of the following statements describes the relationship between the variables?

As elevation decreases, temperature remains the same.

As elevation increases, temperature decreases.

As elevation decreases, temperature decreases.

As elevation increases, temperature increases.

The table shows health care spending per capita in a group of African nations. Based on this information, which of the following countries had the greatest change in dollars spent per capita from 2013 to 2015?

Tanzania

Sudan

Karya

Eritrea

Which of the following percentages is equivalent to $5 \frac{1}{4} \times 7$

525%

5.25%

5.14%

514%

Which of the following is the median of the data set below?

TEAS 7 SCIENCE QUESTIONS

Which of the following contains a human's hereditary information?

Plasmids

Chromatin

ATP

Histones

If A represents atomic mass and Z represents atomic number, which of the following describes an atom after a proton is emitted from its nucleus?

$A+1Z+1$

$AFL.Z-1$

$A-1,Z-1$

$A-L.Z-1$

Which of the following types of cells stimulates other immune cells to attack and destroy foreign agents?

Helper T-cells

Plasma cells

Natural killer cells

Cytotoxic T-cells

Experiments cannot validate hypotheses, only falsify them. The statement above can be restated in which of the following ways?

Proving a hypothesis exempts it from further testing.

A hypothesis that has not been falsified remains provisional.

Certain concepts cannot be subjected to direct experimentation.

Until disproved, an explanation for an observation is valid.

Which of the following tissues lines the interior surface of the heart?

Endocardium

Epicardium

Myocardium

Pericardium

Which of the following is classified as a noninfectious disease?

Chikungunya

Psoriasis

Brucellosis

Dengue

An experienced mountaineer decides to climb Mount Everest, taking the same route in the same season and with similar materials and equipment used in a fatal 1924 expedition. Which of the following is the scientific purpose of such a climb?

To measure the oxygen levels at high elevation

To identify routes that can be explored in future climbs

To show that modern technology makes climbing safer

To assess why the earlier expedition failed

Which of the following tools can be used to measure the turbidity of a liquid by measuring the transmission of light through the sample?

Centrifuge

Microdensitometer

Electrophorometer

Spectrophotometer

Which of the following respiratory structures is affected by a disease that disrupts gas exchange, such as emphysema?

Alveoli

Secondary bronchi

Trachea

Primary bronchi

In pea plants, green pod color (G) is dominant to yellow pod color (g). A cross was done between

a plant with green pods and a plant with yellow pods. Of the resulting offspring, 50% had green

pods and 50% had yellow pods. Which of the following were the genotypes of both parent plants?

sess

GgGg

Gggg

GGgg

Which of the following would result in an increase in the rate of a chemical reaction?

Decreasing the concentration of the reactant

Using a mortar and pestle to grind a solid reactant to a powder

Sealing the reaction in an airtight container

Adding more of the product

Which of the following is correct regarding the pH scale?

A substance with a pH of 3 is 10 times more acidic than a substance with a pH of 4.

A substance with a pH of 3 is two times more acidic than a substance with a pH of 4.

A substance with a pH of 3 is two times more alkaline than a substance with a pH of 4.

A substance with a pH of 3 is 10 times more alkaline than a substance with a pH of 4.

Use the table below to answer the question.

Object	Mass	Time of Fall
A	5.0 g	2.0 sec
B	5.0 g	1.0 sec
C	30.0 g	0.5 sec
D	35.0 g	1.5 sec

Which of the following conclusions is supported by the data?

The greater the mass of an object, the faster it will fall.

The time of fall is independent of the mass of the object.

Air resistance is greater for A than for B.

Objects A and B will fall at the same rate.

A slice of apple left on a table slowly goes brown due to an enzymatic reaction. Dipping the apple slice in lemon juice prevents it from browning. Which of the following best explains this result?

Lemon juice functions to dilute the brown material.

Lemon juice functions to bleach the brown material.

Lemon juice has a pH which inactivates the enzymes.

Lemon juice has enzymes which reverse the browning reaction.

Which of the following is an example of a biological macromolecule?

Protein

Amino acid

Nucleic acid

Monosaccharide

Which of the following describes one difference between skeletal muscles and cardiac muscles?

Skeletal muscles are autorhythmic, whereas cardiac muscles are not.

Cardiac muscles contain intercalated discs, whereas skeletal muscles do not.

Skeletal muscles are found in the viscera, whereas cardiac muscles are found in the cranium.

Cardiac muscles are voluntary, whereas skeletal muscles are involuntary.

Which of the following atoms is most likely to become a cation?

Potassium, atomic number 19

Helium, atomic number 2

Fluorine, atomic number 9

Oxygen, atomic number 8

The component of an atom that possesses relatively little mass, thus being negligible in calculating the atomic mass number, is the

Quark

Neutron

Proton

Electron

Parasitic worm infestation is hypothesized to be damaging to the host. However, scientists have recently discovered that worm infestation can relieve the effects of certain autoimmune disorders. In which of the following ways should the hypothesis be modified, given the new findings?

Lack of worm infestations is the cause of some autoimmune disorders.

Worm infestation reduces the severity of certain autoimmune disorders.

Worm infestation prevents the body from immune malfunction.

Worm infestations exacerbate the body's immune reactions.

When a volcano erupts, its actions are similar to which of the following events?

A tree root pushing up through the pavement.

A building burning to the ground.

A flood eroding the banks of a stream.

A can of soda fizzing when it is opened.

Which of the following organelles is the site of intracellular digestion?

Lysosomes

Centrosomes

Ribosomes

Mitochondria

Which of the following cells transfers pigment granules to adjacent epidermal cells?

Merkel cells

Langerhans cells

Keratinocytes

Melanocytes

Which of the following hormones regulates blood calcium levels?

Melatonin

Growth hormone

Parathyroid hormone

Norepinephrine

In order to determine the effects of energy drinks on women's running speed, researchers gave 300 women an energy drink and then recorded the time it took each of them to run 2 miles. After collecting the results, researchers concluded that energy drinks increase the speed of running in women.

Which of the following further tests would best help to support this conclusion?

Repeat the same experiment, using 300 men.

Repeat the experiment, giving half of the women water and the other half the energy drink.

Repeat the experiment, giving the women two different energy drinks.

Repeat the experiment, having half of the women run 2 miles and the other half run 5 miles

Which of the following body systems breaks down proteins into amino acids?

Endocrine

Excretory

Digestive

Circulatory

Which of the following is the term given to the sequence of nucleotides that contains the information to make a specific protein molecule?

Operator

Promoter

Locus

Gene

The hip is an example of which of the following type of joints?

Ball-and-socket

Pivot

Hinge

Gliding

Which structure of the female reproductive system is the source of the blood and mucosal tissue during menstruation? (You will find hot spots to select in the artwork below. Select only the hot spot that corresponds to your answer.

L

If a portion of a strand of DNA bases reads 5' AGCTAGCGT 3', what would the sequence of bases on the complementary strand read?

3' AGCTAGCGT 5'

3' TCGATCGCA 5'

5' UCGAUCGCA 3

STCGUTC GCU 3

Which of the following nucleotides is only found in RNA?

C

Guanine

Thymine

Adenine

Uracil

Which of the following pathways best represents the expected flow of blood from the human heart to an organ?

Blood pumped from the heart first enters arteries that then narrow to form veins that deliver blood to the organ.

Blood pumped from the heart first enters arteries that then narrow to form arterioles that deliver blood to capillaries of the organ.

Blood pumped from the heart first enters veins that then narrow to form venules that deliver blood to arteries of the organ.

Blood pumped from the heart first enters arterioles that then merge to form arteries that deliver blood to the organ,

Which of the following correctly orders structures from simple to complex?

Organs, tissues, cells, atoms

Cells, tissues, atoms, organs

Atoms, organs, tissues, cells

Atoms, cells, tissues, organs

Which of the following structures drains oxygen-depleted blood from the kidneys?

Ureter

Renal artery

Urethra

Renal vein

The vermiform appendix extends from the region of the large intestine known as which of the following?

Jeyunum

Cecum

Ischium

Rectum

Which of the following structures is present in both prokaryotic and eukaryotic cells?

Golgi apparatus

Cell membrane

Chloroplast

Endoplasmic reticulum

Which of the following molecules contains the fewest covalent bonds?

Chlorine molecule (Cl_2)

Ammonia molecule (NH_3)

Water molecule (H_2O)

Methane molecule (CH_4)

The "gray matter" of the brain is largely made up of which of the following?

Meninges

Neuron cell axons axons

Neuron cell bodies

Corpus collosum

Which of the following parts of the eukaryotic cell is responsible for making ATP?

Nucleus

Centrioles

Lysosome

Mitochondria

Which of the following endocrine organs in the diagram below is involved in regulating milk production following childbirth?

Thyroid gland

Adrenal glands

Pituitary gland

In which of the following locations does fertilization of an egg cell typically occur?

Uterus

Fallopian tube

Ovary

Cervical canal

Using the equation $\text{pH} = -\log[\text{H}^+]$, a solution with a $[\text{H}^+] = 10^{-9} \text{ M}$ has a pH of which of the following?

10

9

5

1

Which of the following organs removes nitrogenous waste from the body?

Large intestine

Gall bladder

Liver

Kidneys

Which of the following processes causes most of the carbon dioxide from the blood to move into the alveoli?

Conversion to carbon monoxide

Diffusion down a concentration gradient

Passive transport using carrier proteins

Active transport using energy

Which of the following characteristics of water helps explain why coastal areas experience less dramatic temperature changes during the day than more inland areas?

Water's adhesive properties prevent evaporation.

Water forms covalent bonds with other water molecules.

Water has a high specific heat capacity.

Water is a versatile solvent

Which of the following demonstrates a chemical reaction of water?

Water produces gas with sodium metal.

Water boils to produce steam at 100 deg * C(212 deg * F)

Water dissolves sugar.

Water and oil separate when combined.

Which of the following distinguishes endocrine and exocrine glands from one another?

The biochemistry of their secretions

The effect their secretions have on the target cells

The presence or absence of nerve innervation

The presence or absence of ducts

A study found two processes, Process A and Process B, to be correlated. Which of the following is true for these processes?

The study cannot indicate whether Process A and B have a negative relationship.

The study cannot indicate whether Process A and B have a positive relationship.

The study indicates that Process A causes Process B.

The study does not indicate a causal relationship between the processes

Escherichia coli is plated on nutrient agar plates that each contain a different type of antibiotic.

The shaded area represents growth of the bacteria. Which of the following plates contains bacteria that were most resistant to the antibiotic?

Nutrient agar plate

Nutrient agar plate

Nutrient agar plate

Water molecules enter cells by which of the following transport mechanisms?

Proton pumps

Facilitated diffusion

Gated channels

Electrochemical gradients

TEAS 7 ENGLISH QUESTIONS

In which of the following situations is it most appropriate to use informal language?

A peer review in an academic journal

An email to a professor about an assignment

A text message to a friend from class

A job application for a teaching position

Which of the following words is spelled correctly?

Hieght

Foriegn

Receive

Vien

Which of the following is the subject of the sentence below?

Taylor sat under a tree.

tree

sat

under

Taylor

Which of following sentences demonstrates proper pronoun-antecedent agreement?

If a person wants to travel to the moon, she must get a job at a space technology station.

If a person wants to travel to the moon, you must get a job at a space technology station.

If people want to travel to the moon, you must get a job at a space technology station.

If people want to travel to the moon, he must get a job at a space technology station.

Which of the following sentences demonstrates proper subject-verb agreement?

Physics is a difficult subject to learn.

Measles usually spread through respiratory fluids.

The study of various sciences are compelling.

News travel fast.

Which of the following is the object of the preposition in the sentence below?

Martha laughed at the clown.

clown

laughed

the

at

Which of the following sentences uses the correct capitalization?

The Red Cross is a liaison for the families of Soldiers stationed in other countries, acting as a go-between for separated spouses, parents, and children,

The Red Cross is a liaison for the families of soldiers stationed in other countries, acting as a go-between for separated spouses, parents, and children.

The Red cross is a Liaison for the families of Soldiers stationed in other countries, acting as a go-between for separated spouses, parents, and children.

The Red cross is a Liaison for the families of soldiers stationed in other countries, acting as a go-between for separated spouses, parents, and children.

Which of the following prefixes attached to a root word would be part of a sequence of events?

Co-

Post-

Sub-

Ant

Which of the following is the adverb in the sentence below?

The athletic woman ran swiftly across the field.

swiftly

lal

across

athletic

in the word "circumnavigation," the Latin prefix "circum" means to move in which of the following directions?

Forward

Sideways

Around

Up

Which of the following sentences would most likely be found in an email from a professor to her biology students at a college?

I didn't get any constructive feedback on my paper during the peer review last week.

Research groups from the 10:30 a.m. Tuesday class should meet in the library this week.

Traffic on Highway 32 will be rerouted to Main Street during renovation of the 7th Street Bridge.

We want to go out for dinner, but we haven't decided where to eat yet.

Which of the following is the meaning of "wellness" according to the suffix?

How something is well

Why something is well

One who is well

The state of being well

Which one of the following sentences contains a dangling modifier?

My brother had an old truck that sat by the garage that needed paint.

Adequate lighting is important for anyone who is studying or reading.

The contented puppy sat by the sleeping young child.

Drivers in our state are confused by the outdated driving law.

Based on an analysis of word structure, which of the following is the meaning of the word "bibliophile"?

Reference text

Book lover

Novel publisher

Resource list

Which of the following is a step in the proofreading process?

Checking primary sources

Checking secondary sources

Checking for proof of authorship

Checking for spelling

Which of the following sentences demonstrates proper subject-verb agreement?

The boys and girl visits my house.

The boys and girl in our club is in the cafe.

The boys or the girls sings in the choir.

The boy or the girls come to school late.

Which of the following prefixes implies duplication when attached to a root word?

un-

in-

dis-

re-

A pastry chef is organizing the syllabus for a breads class at a local community college. They first want to make sure that the students know about the basic types of equipment used in commercial bread making. After discussing equipment, the chef wishes to teach a few lessons on simple doughs, including traditional ones and those with ancient grains, and then cover enriched doughs in both sweet and savory applications. Given all of these requirements, how should the chef outline the syllabus? (Move the options into the box on the right, placing them in the selected order. Use all the options.)

Equipment

Simple doughs

1. Traditional

2. Ancient Grains

Enriched doughs

1. Sweet

2. Savory

Which of the following is a complex sentence?

Since time was running short, I hurriedly brushed my teeth while breakfast was warming up.

Time was running short, so I hurriedly brushed my teeth while breakfast was warming up.

I brushed my teeth while the coffee brewed because time was running short
I used the time while the coffee was brewing to brush my teeth.

Which of the following sentences is correctly punctuated?

Alex enjoys cooking his family and, his dog.

In short, we wish to congratulate Keisha, Marius, and Jayma for making this presentation so interesting and informative.

On the hillside Sung-ho saw his sister mother and father.

I love to attend yoga class, ashtanga style yoga is my favorite.

The graceful dancer moved across the stage as the music began to play.

Which of the following is the meaning of the suffix "-ful" as used in the sentence above?

State of

Characterized by

Worthy

Able

Which of the following sentences is punctuated correctly?

Although the town appears strikingly dull, most folks say its a nice place to live.

Although the town appears strikingly dull; most folks say its a nice place to live.

Although the town appears strikingly dull most folks say it's a nice place to live.

Although the town appears strikingly dull, most folks say it's a nice place to live.

Which of the following transitional expressions should a student use to show sequence?

Nevertheless

Furthermore

Elsewhere

Similarly

The class is nervous about first exam.

they're

its

it's

its

Which of the following statements about a paragraph's topic sentence is true?

It summarizes the main idea of the essay.

It should be as detailed as possible.

It should be as general as possible.

It summarizes the main idea of the paragraph.

Which of the following sentences is grammatically correct?

The student wrote too slow to finish the exam, but he has always been a slowly writer.

The student wrote too slowly to finish the exam, but he has always been a slowly writer.

The student wrote too slow to finish the exam, but he has always been a slow writer.

The student wrote too slowly to finish the exam, but he has always been a slow writer.

Which of the following is a complete sentence?

When I was young and loved going for runs in the park.

Walking with a limp as a result of the thorn.

Running through the park before breakfast.

I walked all three dogs around the park this morning.

Proper sleep is..... to good health.

cructial

crusial

crutial

crucial

According to the prefix "sub-", which of the following words defines "subterranean"?

Underground

Aboveground

Overpass

Causeway

Which of the following is the correct definition for the prefix "inter" as used in words like "interstate" or "international"?

One who is the subject

A thing or process

Between or among

Government rule

Which of the following sentences contains a conjunction?

The shovel was placed against the house.

My grandfather told me all about his childhood.

I finished mowing the lawn and I took a long nap.

I hid my journal beneath the bed.

Which of the following sentences requires a citation?

Some sunscreens have an SPF of 35 or higher.

One in five Americans will develop skin cancer by the age of 70.

Any exposed skin is susceptible to sunburn.

Prolonged sun exposure can result in a burn.

Hey, gangi

Lately there have been a whole bunch of small but avoidable errors in the formatting and styling for our website. Although I'm happy to review your work, I cannot continue to spend this many hours per day playing firefighter. Please take a sec to refamiliarize yourselves with our style manual and be sure to follow it closely going forward.

Thanks,

Morgan

The above is an internal memo from the head of a web development team. Which of the following words or phrases are informal within a business context? (Select all that apply.)

going forward

Hey, gang!

playing firefighter

website

a whole bunch

take a sec

Which of the following sentences correctly follows the rules of capitalization?

I plan to enroll in College next year.

Even though he moved to New York, he was born in a Western town.

The Geography students took a class trip to the Rocky Mountains.

The Al Plumbing Board of Directors gave every employee a raise.

Which arrangement of the following five sentences yields the most logically organized paragraph? (Move the options into the box on the right, placing them in the selected order. Use all the options.)

Candy making is easier than it looks, but it does require some specialized equipment at least if you want to do a consistent job

At the top of the list is a special thermometer known, appropriately enough, as a candy thermometer.

The names of these stages, such as "thread" and "hard ball," refer to the results of old-fashioned qualitative tests performed in the days before home kitchens had access to such tools.

Though not used exclusively for candy making, such thermometers have specialized gradations that show when the sugar has been boiled to specific stages.

As with just about anything kitchen-related, it is possible to spend money almost indefinitely on candy making supplies, but the real essentials consist of a few not too expensive items.

The gist of the saying went something like this: If a person wants to get ahead in life, you have to be willing to work for it.

Which of the following language conventions is violated in the sentence above?

Use of a colon

Verb tense

Pronoun-antecedent agreement

Punctuation of an introductory clause

Which of the following transitional expressions should be used to show cause and effect?

In other words

Consequently

For example

Likewise
